CANDIDATE SUMMARY

Undergraduate student with hands-on experience in product research, usability evaluation, and wireframing & prototyping, seeking a UX internship to further develop user-centered and feedback-driven design skills.

EDUCATION

University of Toronto Mississauga Mississauga, ON, Canada

Bachelor of Arts - BA, Double Major in Communication, Culture, Information & Technology (CCIT) and Technology, Coding & Society (TCS) Sep 2024 - May 2029

- GPA: 3.47 / 4.0
- Honors/Awards: UTM Entrance Awards
- Major Coursework: CCT111: Critical Coding (4.0); CCT202: Human-Machine Communication (4.0); CCT204: Design Thinking I (3.7)

INTERNSHIP EXPERIENCE

Technical Product Information Intern **May 2026 - Jun 2026**

Zhongzhou Special Alloy *Shanghai, China*

Special alloy / industrial materials

- Standardized complex B2B product specifications (e.g., material grades, testing requirements) into structured data models, streamlining order entry and improving ERP system alignment.
- Audited order processing workflows to diagnose and resolve high-frequency human errors and billing logic conflicts, implementing error-proofing measures to ensure data accuracy.
- Managed custom business logic and edge cases for high-stakes industrial orders, ensuring non-standard technical requirements were accurately translated into standard manufacturing workflows.
- Collaborated with cross-functional teams to reconcile custom client demands with rigid internal technical constraints, balancing business requirements with system limitations.

Product Research Intern **May 2025 - Jun 2025**

Jiangxi Ruobang Science & Technology Co., Ltd. *Shenzhen, Guangdong, China*

Electronic packaging materials manufacturer

- Supported sales and product teams by consolidating product information and customer requirements, improving internal clarity around product offerings.
- Organized product specifications and application details into structured reference materials used for internal communication.
- Conducted preliminary research on product applications and usage contexts to support clearer product understanding.
- Participated in cross-functional meetings to align research findings with sales and product workflows.
- Contributed to documentation that supported day-to-day sales and product-related operations.

Business & Product Support Intern **Mar 2024 - Jun 2024**

San Ying Packaging (Jiang Su) Co., Ltd. *Shanghai, China*

Electronic packaging materials manufacturer

- Conducted market research on composite hose products to identify industry applications and demand patterns.
- Collected and organized customer satisfaction feedback to support internal product and service evaluation.
- Contributed to environmentally focused product discussions by supporting plastic materials selection aligned with international standards.
- Assisted the team in aligning product materials and design considerations with international environmental compliance requirements.
- Accompanied client visits to observe customer needs and real-world usage contexts.
- Analyzed the company’s positioning within domestic and international markets to support business understanding.

LEADERSHIP EXPERIENCE

Vice President, Events **May 2026 - Present**

Taiwan Republic of China Student Association at the University of Toronto Mississauga (ROCSAUT) *Mississauga, ON, Canada*

- Lead event planning and coordination by defining goals, identifying participant needs, and shaping event concepts and formats.
- Guide team discussions, logistics planning, and materials sourcing to support smooth event execution.
- Evaluate event outcomes using attendance, engagement, and qualitative feedback to guide future improvements.

Founder and Design Director **Sep 2026 - Present**

UTMacSA - Macau Students' Association *Mississauga, ON, Canada*

- As a non-Macanese student, joined the founding team at the invitation of a Macanese friend and the association's founding president, who recognized my prior design experience and invited me to support the establishment of the organization.
- Responsible for UX/UI design initiatives across the association, including digital platforms, event registration flows, and overall user experience.
- Designed, developed, and launched the association’s official website, shaping information architecture, UX/UI, content structure, and event registration flows.
- Oversee creative direction, brand identity, and visual design concepts to establish a consistent and recognizable identity for the association.
- Collaborate with executive members across departments on event planning and design strategy while providing creative guidance to fellow design team members.

Events Executive **Jun 2025 - May 2026**

Taiwan Republic of China Student Association at the University of Toronto Mississauga (ROCSAUT) *Mississauga, ON, Canada*

- Planned and coordinated student events by proposing ideas, defining goals, and identifying participant needs.
- Collected and synthesized participant feedback to guide iteration and improvements for future events.
- Collaborated with team members to refine event flows and on-site experiences.
- Facilitated brainstorming and planning discussions to shape event concepts and formats.
- Supported logistics and materials sourcing to ensure smooth event execution.
- Evaluated event outcomes using attendance, engagement, and qualitative feedback.

SKILLS & INTERESTS

Languages: English (IELTS 7.5/9.0)

Technical Skills: Figma, Wireframing (Low- & High-Fidelity), Interactive Prototyping, User Flows, Usability Testing, User Interviews, Survey Design, Information Architecture, Personas & Journey Mapping, Responsive Design, Basic HTML/CSS, Python (basic data analysis), Structured Data Modeling, ERP Workflow Alignment

Certifications & Training: Google UX Design Professional Certificate (Credential ID 6BHEM46MECU9)

Interests: User-centered design, usability and accessibility, product and interface design, analyzing everyday apps, game design and player experience analysis, user behavior observation
